Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/757,724	Applicant(s) MORRILL, PAUL H.	
	Examiner JAGDISH N. PATEL	Art Unit 3693	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 99-163 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 99 has been analyzed as a representative claim of all independent claims.

4. Claim 99 rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted step is a process which that correlates the function code sent to the central processing unit to the funds transfer process. The claim recites authorizing the desired funds transfer without regards to the function code. Without an intervening step that correlates to the funds transfer one cannot ascertain on what basis the desired funds transfer is authorized.

5. It is suggested that a process step which recites that the central processing unit determines the funds amount and the destination account based upon the function code received from the wireless device.

6. Along the same line of reasoning the claim fails to specify the identification of the destination account where the funds are transferred to. This deficiency renders the claimed process vague and unclear as how the funds transfer can be completed without specifying (or determining) the destination account identification.

Art Unit: 3693

7. Note that this deficiency is generic to all independent claims which recite different embodiments of the funds transfer process based upon the input parameters sent to a processing unit.

Oath/Declaration

8. The Oath is defective due to the following reason.

9. The reissue application is a division of application 09/990,327 (Now reissued patent No. RE39,736). Claims 99-163 are presented in the application. Since this application is a reissue of the original patent 5991749, the applicant must point out the differences of the newly presented claims from the original claims (See MPEP 1414). The Oath only states that the new claims included in this application are "not so limited" without clearly pointing out how the newly presented claims are distinguished from the original claims. The claims are accordingly rejected under 35 USC 251 due to defective oath. It is suggested a corrected oath be filed with the response to overcome this rejection.

***Explanation of Support in the Disclosure of the new
claims lacking***

10. The explanation of support for the newly added claims is not provided. The "REMARKS" section fails to provide explanation for support in the disclosure for the newly added claims. The applicant needs to map out each limitation of each claim and show where in the patent the limitation is supported.

Allowable Subject Matter

10. Claims 99-163 are allowed subject to correction of aforementioned deficiencies.

Certificate of Correction

11. Certification of Correction (Appendices A-C) will be entered as a part of the original patent when the application is allowed.
